

# Sprint 3 Plan

Pick an Ingredient

Team All You Can Eat

Sprint Completion Date: 22 July 2019

Revision: 2

Revision Date: 21 July 2019

## Goal:

- Create a more user friendly and functional version of our current version.
- Tutorial

## User Stories:

- User Story 1: As a user, I want to be able to accurately search for recipes because I don't want to question if a recipe will fit in my diet type. (Total: 12)
  - Integrate a search API so that our searches are more accurate (7)
  - Connect the diet type feature to the search (2)
  - Add more error messaging and edge case protection (3)
- User Story 2: As a user, I want to be able to search recipes by calorie and other nutrition information so that I can get more custom recipe results. (Total: 3)
  - Add more search fields (1)
  - Add search functionality for fields (2)
- User Story 3: As a user, I want to be able to log in so that I have my own profile. (Total: 4)
  - Create local user auth (2)
  - Create UI/Auth for a sign up page (1)
  - Create a view of the profile (1)
  - Create a button for navigation to profile view (1)
- User Story 4: As a user, I want to be able to save recipes that I like so that I can come back to them later. (Total: 6)
  - Create a save button that stores current recipe with current user (1)
  - Create a view that allows users to see all their saved recipes (2)
  - Allow users to click on specific recipes to view again (2)
  - Allow users to delete saved recipes. (1)
- User Story 5: As a user, I want to be able to cycle through all recipes that match my preferences. (Total: 1)
  - Create a next button that shows next matched recipe. (1)

**Team Roles:**

- Wylie: Developer
- Michelle: Developer
- Elton: Developer, Scrum Master
- Zeyu: Developer
- Liz: Product Owner

**Initial Task Assignment:**

- Wylie: UI for signUp page
- Michelle: Add error messages
- Elton: Saving recipes to users profiles
- Zeyu: Connect the diet type feature
- Liz: Integrate search API

**Initial Burnup Chart:**
