

Sprint 3 Plan

Pick an Ingredient

Team All You Can Eat

Sprint Completion Date: 22 July 2019

Revision: 1

Revision Date: 16 July 2019

Goal:

- Create a more user friendly and functional version of our current version.
- Tutorial

User Stories:

- User story 1: As a user I want to be able to accurately search for recipes because I don't want to question if a recipe will fit in my diet type. (Total: 12)
 - Integrate a search API so that our searches are more accurate (7)
 - Connect the diet type feature to the search (2)
 - Add more error messaging and edge case protection (3)
- User Story 2: As a user I want to be able to search recipes by calorie and other nutrition information so that I can get more custom recipe results. (Total: 3)
 - Add more search fields (1)
 - Add search functionality for fields (2)
- User story 3: As a user I want to be able to log in so that I have my own profile. (Total: 4)
 - Create local user auth (2)
 - Create UI/Auth for a sign up page (1)
 - Create a view of the profile (1)
 - Create a button for navigation to profile view (1)
- User Story 4: As a user I want to be able to save recipes that I like so that I can come back to them later. (Total: 7)
 - Create a save button that stores current recipe with current user (1)
 - Create a view that allows users to see all their saved recipes (3)
 - Allow users to click on specific recipes to view again (2)
 - Allow users to delete saved recipes. (1)

Team Roles:

- Wylie: Developer
- Michelle: Developer
- Elton: Developer, Scrum Master
- Zeyu: Developer
- Liz: Product Owner

Initial Task Assignment:

- Wylie: UI for signUp page
- Michelle: Add error messages
- Elton: Saving recipes to users profiles
- Zeyu: Connect the diet type feature
- Liz: Integrate search API
